DETAILED ACTION

1. Please note that claim 13 is missing from the claims. The instant claims consist of claims 1-12 and 14-33. Appropriate correction is requested by the applicant.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Claim 1-12 link(s) inventions **I-X'** as set forth above. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1-12. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

I-X'. Claims 14-33, drawn to a monoclonal antibody that specifically binds to a VEGF, classified in class 530, subclass 387.1+, for example.

Please note that the instant claims consist of a multitude of amino acid sequences as set forth for VI and Vh of the monoclonal antibody that specifically binds to VEGF. Hence the claims are grouped as Groups **I-X'**, wherein **X'** represents the number of combinations of the amino acid sequences resulted from the various substitutions within the amino acid sequences for VI and Vh. As written, the claims consists of an unimaginable number of combinations of amino acid sequences for Vh and VI. Each

individual sequence represents a different group and the applicant is advised to elect one groups consisting of a specific SEQ ID NO for Vh and one/or SEQ ID NO for VI OR specific CDRs for the heavy and light chain regions.

2. The inventions are distinct, each from the other because of the following reasons:

The Inventions of Groups I-X' represent separate and distinct antibody products because antibodies can potentially bind to different epitopes with VEGF, including the portions, and percentages of different amino acid segments would invoke a high search burden. Currently, there are approximately eight different databases that accompany the results of a search of one discrete amino acid or nucleotide sequence and each result set from a particular database must be carefully considered. Hence, the search of four different polypeptides, and different polypeptide segments in the databases would require extensive searching and review. Furthermore, because these inventions are distinct for the reasons given above and the search required for one group is not required for another group, restriction for examination purposes as indicated is proper. The examination of all groups would require different searches in the U.S. Patent shoes and the scientific literature and would require the consideration of different patentability issues. Thus the inventions I-X' are patentably distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Furthermore, because these

inventions are distinct for the reasons given above and the search required for one group is not required for another group, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
